2026-2027

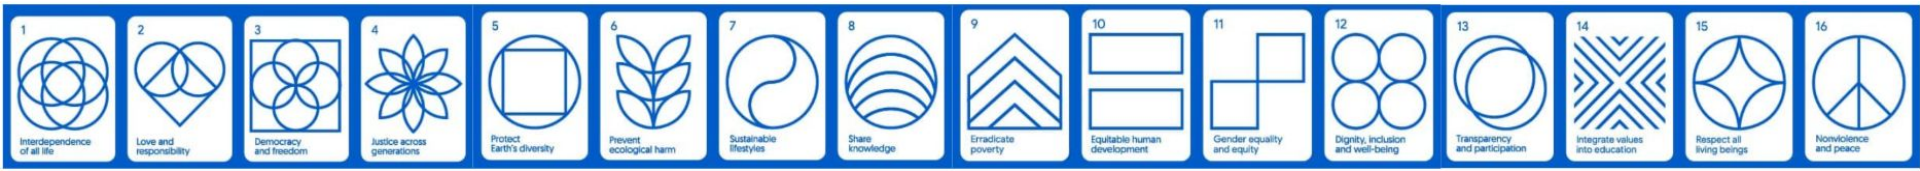
Actual policy plan ONE WORLD Citizens 2026-2027

ONE WORLD Citizens (OWC) works from the power of the youngest generations and their important contribution to the just, inclusive, climate-proof society that we need worldwide to offer our youth and future generations a liveable future.

We believe in the visions, ideas and solutions of the youngest generations and facilitate them to develop their ideas for change into local projects and startups for impact. So that they can implement the change they envision in their own communities. In a sustainable way and preferably as a social entrepreneur, so that they can invest a lot of time in their solution and generate their income with it.

By doing this the youngest generations will be able to take their future into their own hands and improve the basic needs, employment and future prospects of young people in their communities. Working Globally together they can tackle the climate, war and economic challenges they face in a self-reliant and solution-oriented manner locally and worldwide.

That is why we think it is important that young people can learn everything about peace, solidarity, inclusion, sustainability and climate themes and develop digital and entrepreneurial skills. To work globally connected with each other 24/7 via social media and their smartphones and, in collaboration with partners who want to support their vision and ideas, they can work to take their future into their own hands.



Our objectives and activities 2026-2030

Based on our vision, we have been developing and organizing in co-creation with young people since 2012:

1. Non-formal education on peace, solidarity, inclusion, sustainability, and climate, so that all young people can learn about these topics via social media, free of charge and accessible to everyone.
2. An empowerment and social entrepreneurship program, through which they realize successful, sustainable projects and startups.
3. The online community We Grow Together, where they share their ideas and solutions with like-minded young people and partners and further develop them into projects and startups.
4. The online Living Legends School, where young people share their exemplary projects and startups online 'as teachers', so that other young people can learn from them and help the young people replicate the exemplary project or startup in their own communities.
5. Annual youth exchanges and intergenerational dialogue meetings, to create shared visions and collaboration and to expand non-formal education and the exemplary projects and startups to as many countries as possible.

In the OWC 2012-2022, young people from 20 countries have already laid a solid foundation for a bottom-up and scalable concept based on the UBUNTU mentality, the We Grow Together Community, and the Living Legends School. A report on this can be read in the document "OWC Journey 2012-2022".

5 objectives and activities for 2026 and preparation for 2027

After completion of the We Grow Together total concept, we will start a new phase of We Grow Together on which we will focus on

1. Visibility and sharing the We Grow Together and Living Legends Narratives on our new We Grow Together platform.
2. Launch of the Living Legends School for non-formal Peace & Climate Education and Entrepreneurship for all young people, organized by and for young people, with support from all generations. The online school where Living Legends (young people who have developed practical, reproducible projects and start-ups for change) will be the teachers!
3. Expansion of the intergenerational We Grow Together Community, where young people share their ideas and solutions for change, to experience that they are not alone. And where we help each other develop these ideas into concrete, feasible projects and startups for impact.
4. Design and implementation of the We Grow Together community (crowd)funding and social capital model, through which we realize a stable base budget for We Grow Together using the power of small amounts and a growing community that recognizes the importance of Peace & Climate education and entrepreneurship.
5. Organizing two international youth exchanges and dialogue events, in which young people, partners and donors will meet to strengthen cooperation and work on the next phase of We Grow Together 2026-2030

OWC & a sustainable organisation budget

ONE WORLD Citizens has been a volunteer organization since its founding in 2012. The management team, young people, Living Legends, and partners dedicate themselves to the organization in the time they have available alongside their work, school, sports, and family. On this basis, we can always count on the collaboration with young people and achieve our shared mission step by step without large budgets.

We choose to structure our organization on a low budget and in a transferable way, so that support for the innovative power inherent in the youngest generations never has to stop.

Thanks to the Erasmus+ Youth Exchange and Youth Participation grant programs, we are able to organize the annual youth exchanges and dialogue meetings.

In 2026-2027, we aim to design and realize a basic budget for ONE WORLD Citizens, drawing on the strength of communities and small amounts. With this basic budget, we want to provide a basic contribution to the young people who become Living Legends and teach at the Living Legends School, enabling them to continue developing and scaling up the important projects they undertake.

For the community (crowd)funding model we envision, we are focusing on 4 pillars:

1. Crowdfunding via GoFundMe for smaller, project-oriented, concrete needs of Living Legends.
2. Social Shareholder Certificates
3. Regular monthly (small) contributions via the Patreon platform connected to the Living Legends School project.
4. Collaboration with companies and (social) entrepreneurs through our ANBI status.

OWC revenue management and spending

Management

Management of the OWC basic- and grants budgets is in the hands of the Board Director Monique van Dam. Supported by John Tumaini, the treasurer and member of the Supervisory Board.
OWC is contemporary, organized online and has no fixed office. In 2020-2025 the fixed costs of our organization consist of the following cost items: web hosting, banking, administration and license costs:
€ 2.500,00 per year

Spendings

All donations we receive go directly to the budgetary costs of the Living Legends projects for which the money is intended. Nothing is siphoned off.

OWC has a Supervisory Board whose members all dedicate themselves as volunteers and unpaid, driven by their passion for a better life, a better world, and a better future for all young people.
